EYE WASH DISCLAIMER IMPORTANT: Faucet-mounted eyewash requires two motions to operate (turn on water, pull knob to activate eyewash flow). Therefore, John Boos does not believe that these units meet the provisions of ANSI Z358.1-2014 as eyewash units. These units are intended solely as supplemental units in addition to dedicated, plumbed eyewash equipment installed in the workplace. Faucet-mounted eyewashes should be used with cold or warm water only. Use of hot water might cause scalding. Eyewash attachment not to be used with electronic faucets.
